Open-source Software

Technology Consulting Service

- Where Sorintians ardently embrace innovation, unlock boundless openness, foster creativity and unveil new horizons.
- Unlike proprietary software, open-source projects are accessible to the public. Enabling free reading, usage, reconfiguration, and modification.
- Open-source projects are a collaborative effort involving volunteers and contributors worldwide. In most cases, governed by licenses that guarantee code quality and transparency.
- SORINT.lab provides premium, enterprise-grade support services for open-source solutions. Tools like:
 - Proactive Database Software Asset Management
 - Automation for CI/CD
 - Cloud native PostgreSQL manager
 - Firewalling
 - Organization hierarchy representation

Pillars of Open-source

Compelling reasons

Transparency

Easily evaluated. No malicious code. No vendor lock-in & open standards.

Collaboration, education, & innovation

A rich worldwide knowledge and experience sharing. Continuous improvement with space to innovation to match needs and scaling.

Security

Regular code review and faster identification and resolution of security issues.

Customizable and adaptability

In contrast to proprietary software, users enjoy the freedom to modify every aspect. Adapting to various industries and use case.

Lifespan

The open nature of the code allows continuity by any developer/team. No dependency.

Cost-effective

Free of charge.

Some of Ours

Products

Proactive Database Software Asset Management

CI/CD redefined

A different way to think firewalling

Rew-splloit helps you analyse Windows shellcode and more

PostgreSQL cloud native high availability
