

Open source
Software Products

Agenda

- Open Source
- Why Open Source
- Some Products by SORINT.lab
- Service's Delivery Models

OPEN SOURCE

A collection of software solutions openly accessible to the public, available for free reading, use, reconfiguration, and modification

Where **SORINTians** ardently embrace innovation, unlock boundless openness, foster creativity and unveil new horizons

Pillars of open source

Our mission is to provide the best solution to the enterprise needs

Transparency

Easily evaluated. No malicious code. No vendor lock-in & open standards.

Collaboration, education, & innovation

A rich worldwide knowledge and experience sharing. Continuous improvement with space to innovation to match needs and scaling.

Security

Regular code review and faster identification and resolution of security issues.

Customizable and adaptability

In contrast to proprietary software, users enjoy the freedom to modify every aspect. Adapting to various industries and use case.

Lifespan

The open nature of the code allows continuity by any developer/team. No dependency.

Free of charge

Cost effective

Products

Some of ours

Ercole

A Proactive Database Software Asset Management solution focused on optimizing licenses and ensuring compliance. Essential for FinOps activities, multicloud environments, for optimizing performance, capacity and security level.

Agola

A CI/CD system with a lot of great features like advanced and reproducible workflows (runs), containerized tasks, fully distributed and high-available.

Sircles

Enables the representation of your organization's hierarchical structure, roles and people. A tool that helps SORINTians collaborate with ease. Quick, fast, and informative.

Quarterdeck

A solution media for managing and initiating employee's ideas, in an engaging manner. Ready for customization to match several enterprise needs.

Our mission is to
provide the best
solution to the
enterprise needs

SYNwall

Brings a total new way to approach firewalling! No more issues with rules, IP, ports, etc. A simple PSK will allow a low-maintenance firewall-like security. Built with IoT in mind for environment compatibility.

Stolon

Stolon is a cloud native PostgreSQL manager for PostgreSQL high availability. It's cloud native because it'll let you keep an high available PostgreSQL inside your containers (kubernetes integration) but also on every other kind of infrastructure (cloud IaaS, old style infrastructures etc...)

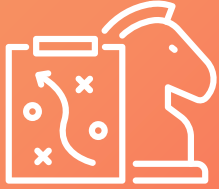

Rew-Sploit

Helps you analyse windows shellcode like no other tool does!
